Application Development

Custom Computer Programming Services

CDS has earned a reputation as an innovator and a pioneer in supporting complex, mission-critical organizations with advanced technology integration, application development, enterprise authentication, website design and development, web content management, and quality assurance. CDS is uniquely positioned to deliver on complex task orders by being one of the major health IT contractors who has successfully engineered, implemented and managed compliant operational environments for TRICARE, Medicare and commercial organizations. Projects include application development, integration, testing, business case processing, Section 508 compliance and remediation, and full system development lifecycle support — from requirements gathering to deployment and training. CDS holds a FISMA High rating, HIPAA compliance, ISO 9001:2008 certification | SAS 70 | SSAE 16 | SOC 2 audit compliance and CMMI Level 3 certification.

Cybersecurity

Policy | Certification | Assessment | Operations

Cybersecurity is a priority within the Department of Defense (DoD) with constant changes reflecting increased importance and synchronization among federal agencies to protect the unique requirements of DoD missions and warfighters. CDS' proven cybersecurity processes and tools are based off the National Institute of Standards and Technology (NIST) Risk Management Framework (RMF). The NIST processes provide the basic level of security, meeting all service level agreement security requirements, external contractual and legislative requirements and imposed policies.

Through CDS' partnerships, we provide enterprise systems management, equipment life-cycle management, Information Management/Information Technology (IM/IT) operations, program management services and cybersecurity assessment and authorization services for federal and commercial agencies. The services CDS can provide include:

- Cybersecurity management services
- Cybersecurity operational support
- Assessment and Authorization (A&A)
- DoD Risk Management Framework compliance consulting
- Defense acquisition cybersecurity services and support

Enterprise Content Management / Business Process Management

Improve | Standardize | Automate Processes | Documentation

Enhancing your current workflow through automation, self-service and process re-engineering can have dramatic operational effects. Business process management (BPM) provides the ability to view, model, automate, process and standardize work that wraps around legacy systems, increasing efficiency and expediting turnaround. CDS' BPM software ties disparate software systems together to create seamless operations for its customers.
