CMS CLOUD FUSION SUMMIT

Connecting Technology

- We connect business goals with secure, scalable technology solutions by integrating infrastructure, cloud, cybersecurity, resiliency, and emerging technologies into a unified enterprise ecosystem.

Inspiring Innovation

- We enable innovation and digital transformation by helping organizations modernize with minimal disruption while leveraging proven cloud, data center, and security expertise.

Powering the Mission

- We deliver secure, resilient, and high-performing technology services that support mission success, operational continuity, and long-term organizational value.

Infrastructure & Platform Solutions

- We design, implement, and manage scalable enterprise infrastructure platforms that optimize current investments while supporting future growth and performance.

Cloud-Enabled Data Center Infrastructure & Services

- We modernize data center environments through secure hybrid and multi-cloud architectures that balance flexibility, compliance, cost efficiency, and business needs.

Enterprise-Scale Data Resiliency & Protection

- We protect critical data and systems through comprehensive backup, recovery, disaster recovery, and business continuity solutions that minimize operational disruption.

Cybersecurity & Security Compliance

- We strengthen cybersecurity and compliance readiness by proactively identifying risks, protecting critical assets, and enabling secure innovation across the enterprise.

Customer Success Stories

CMS Email Resiliency

CMS email workloads can be supported across East and West Coast environments, providing resilience and reducing the risk of downtime.

Mainframe DR / Failover

We modernize data center environments through secure hybrid and multi-cloud architectures that balance flexibility, compliance, cost efficiency, and business needs.

Data-Center Consolidation / Hybrid Integration

IaaS has consolidated workloads and built capabilities to integrate with cloud platforms, supporting the broader hybrid infrastructure strategy.
